

Contemporary
Design
for Children

WWW.IOKIDSDESIGN.CO.UK

IO Kids Design strives to create inspiring and bold design that sparks a child's excitement and innate curiosity.

The ethos of our brand is that design should combine style with versatility and longevity while embracing a real sense of fun that appeals to children and adults alike.

We want children not just to see an object for its obvious function, but also to imagine its possibilities.

Just as each child is unique, we hope to give personality to the objects we create.

A close-up photograph of several tree trunks and branches. The bark is white with dark, horizontal lenticels and some vertical fissures. The branches are thin and dark, extending from the main trunks. The background is a pale, overcast sky.

Ethos of our Brand

Committed to environment our collection is made in Europe and was conceived with sustainable thinking applied to the designs.

The products are tested by FIRA (Furniture Industry Research Association) and comply with all UK and European safety regulations.

We have chosen Plywood for our collection because of its strength, warmth and durability. This versatile material is easy to use in different ways such as bending and flexing. Those processes enhance its very essence bringing out its beauty, grain and texture.

Our factory combines traditional methods with modern technology with each piece being made with great care and attention to detail and precision.

IO Bunk Pod

An all-in-one space to sleep,
store and study.

We have designed our products with the idea of multi-functionality at the centre of each piece. This ensures that the furniture can be used not only for a long time but also in different ways.

We believe in functional, adaptable, well
engineered and, above all, fun furniture
that can grow with a child.

The visible layers of dark and light wood are a reminder that this beautiful material is a great synergy of both the natural and the man-made.

IO Doodle Box

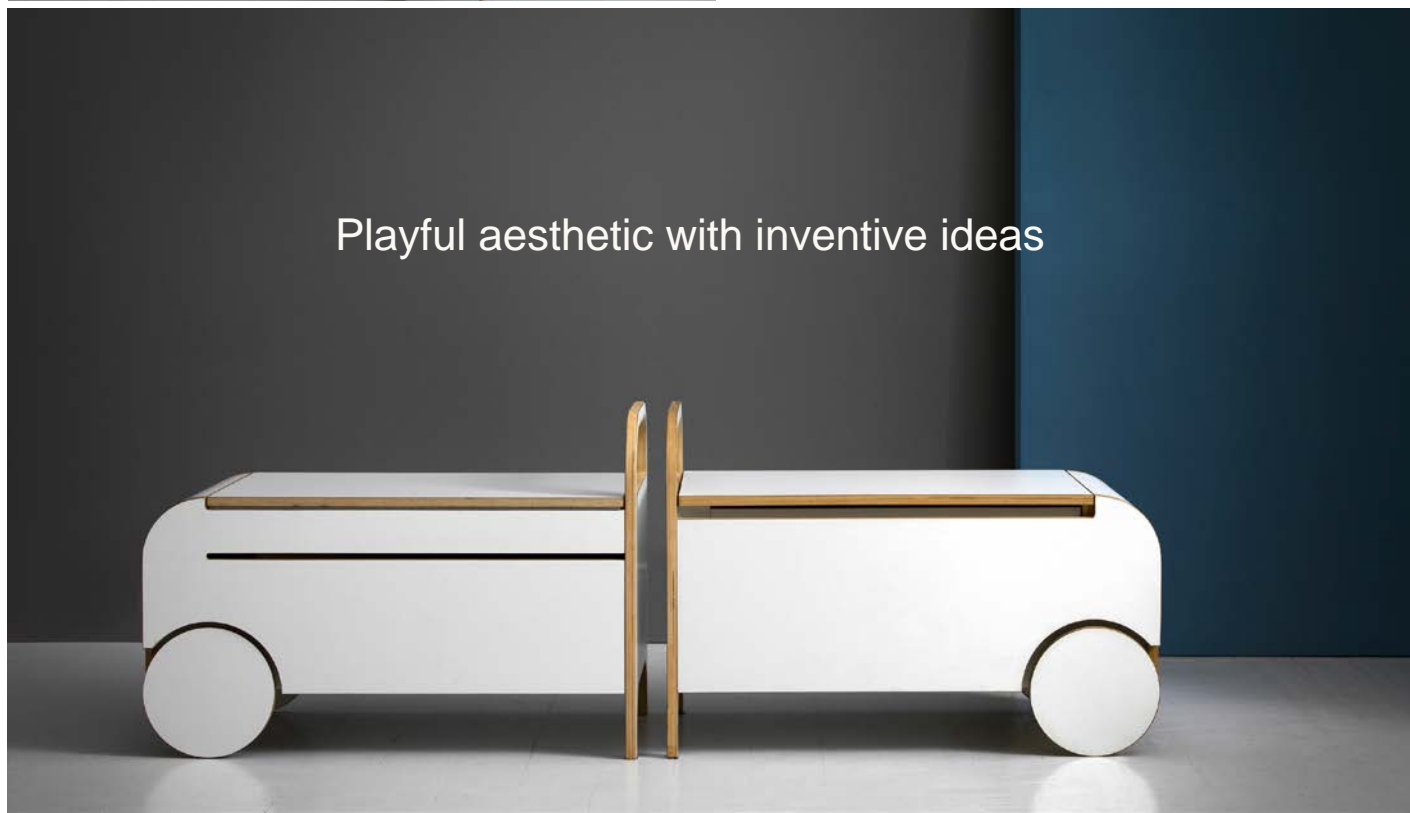

A portable storage unit designed to accommodate children's interest in learning, drawing and creating.

Throughout the design process there is a focus on craftsmanship and detail. By working closely with our production team we ensure the integrity of our vision down to every cut and bend.

Playful aesthetic with inventive ideas

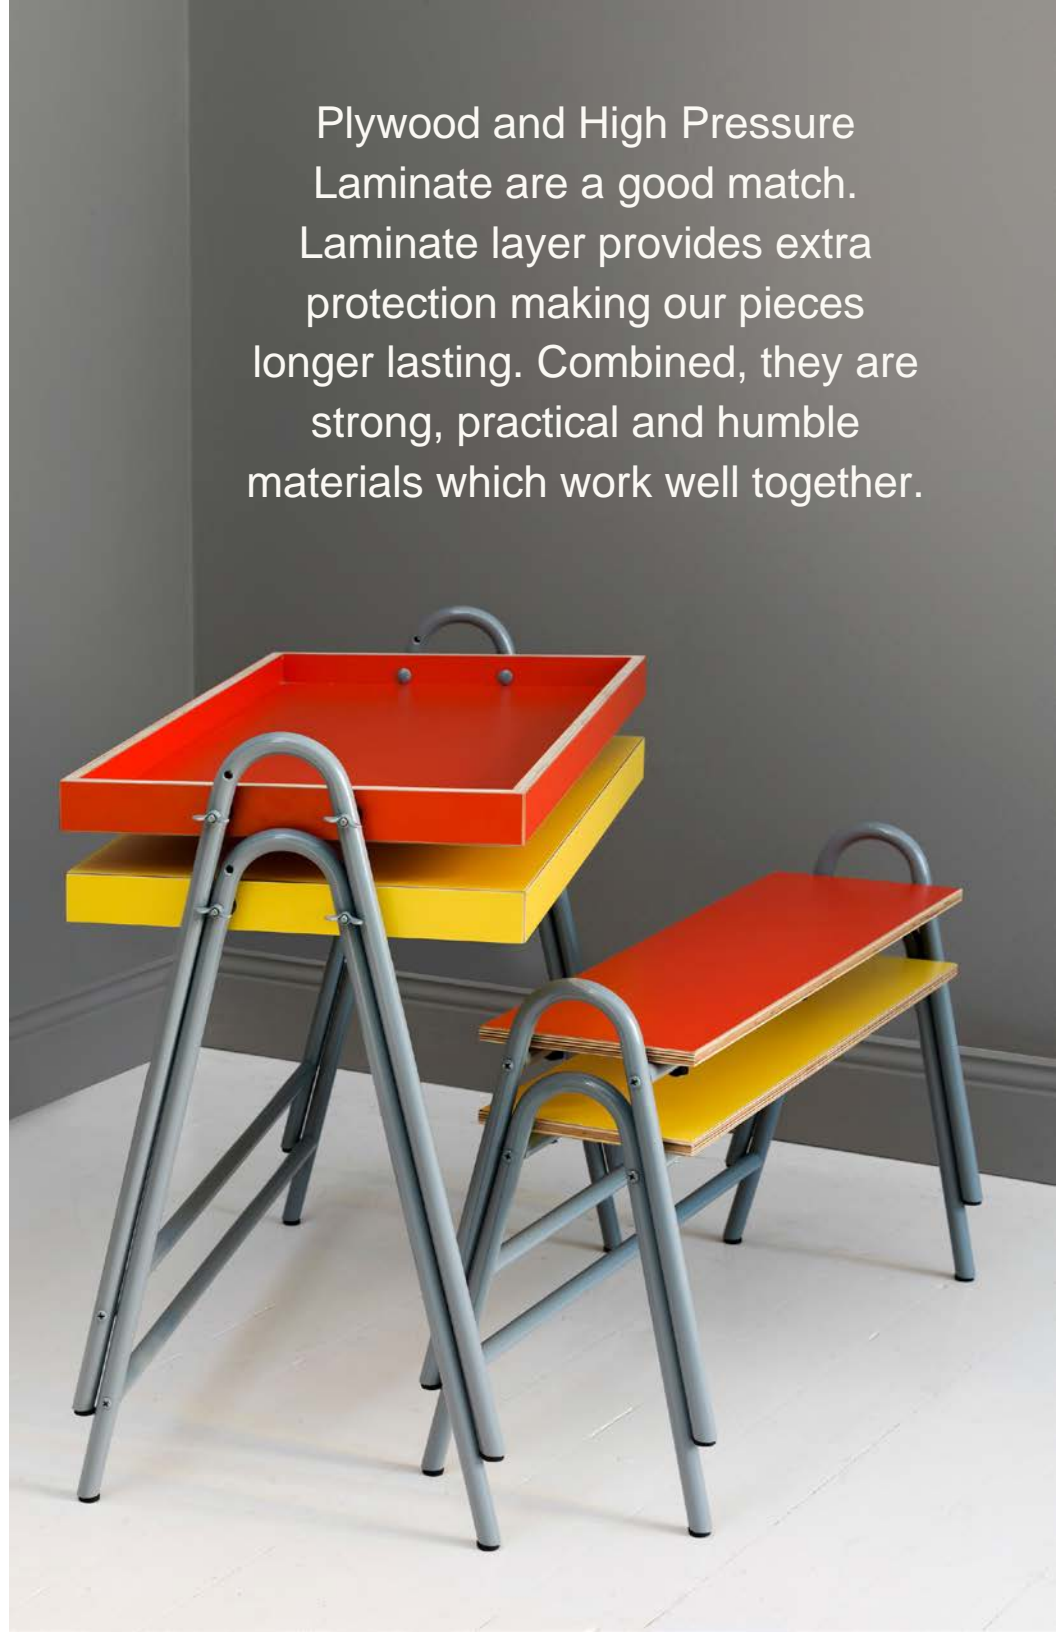

IO Tray Table and Bench Set

Thoughtfully conceived and lovingly engineered, the IO Bench and IO Tray/Table Set combines clean lines with ease of assembly, and realises a joyful space for your child to make, do and design.

Plywood and High Pressure Laminate are a good match. Laminate layer provides extra protection making our pieces longer lasting. Combined, they are strong, practical and humble materials which work well together.

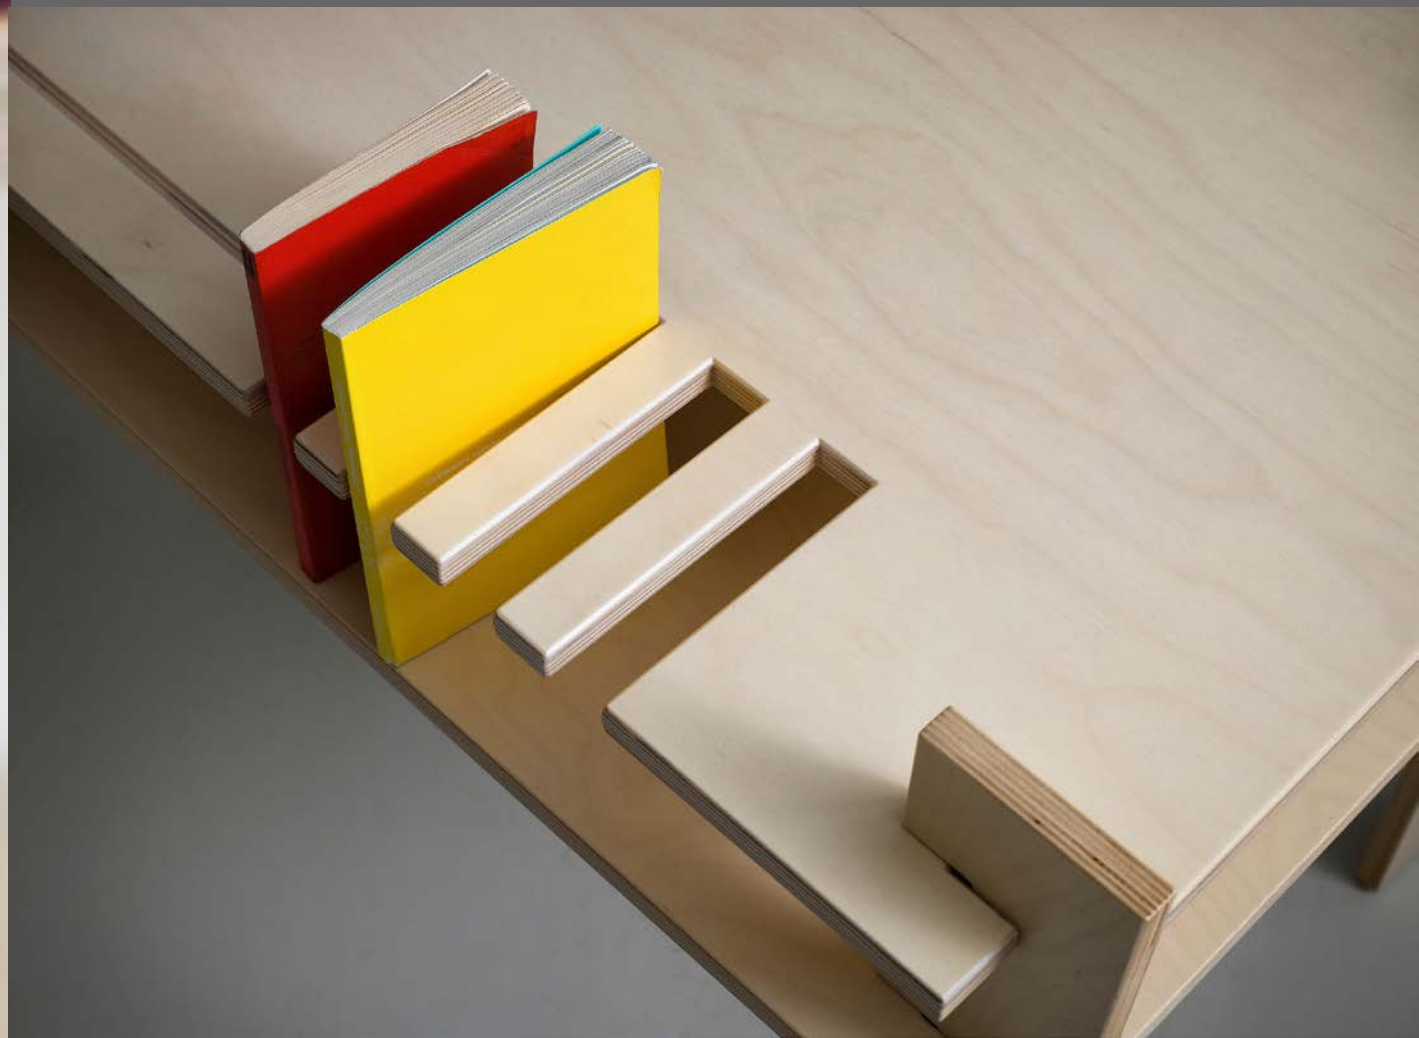

IO Desk

Flat packed and easily constructed -
The IO Desk comprises of just 6
pieces which are easily slotted
together.

Paired back functional simplicity
with practical and surprising details.

IO House Light

IO Kids House Wall Light combines the mystery of the not-quite-seen with the reassurance of a warm glow.

IO House Light is made from interlocking Plywood pieces – no glue, no screws, no fixings – with smooth, tactile edges, so that a child can, with supervision, assemble it themselves. When illuminated, its inner recesses can be half-seen, sparking curiosity and questions.
